THE MODERN AMERICAN RIVERBOAT™

American Cruise Lines is proud to offer a fleet of new *American Riverboats*—the first modern riverboats available in the U.S. They are technically advanced, possess the newest safety and navigation equipment, and are the most environmentally friendly small ships on U.S. rivers. These modern riverboats meet the highest emissions standards, have tiny carbon footprints, and feature elegant interior design.

The company's *American Riverboats* accommodate 180 guests and many showcase a unique (patented) opening bow and retractable gangway, which enables them to make bow landings wherever necessary. The modern boats have soaring multi-story glass atriums, spacious cabins, enormous suites, and single cabins—all with private furnished balconies. Designed with three times the glass of other U.S. riverboats, they offer spectacular views from everywhere on the ship, as well as comfortable lounges, gorgeous sun decks, walking tracks, grand dining rooms, and smaller casual cafés.

American's next generation of modern riverboats, beginning with 2026's *American Encore*, are the finest riverboats on the market—setting the new standard for riverboats globally. Each showcases a 1,500 square foot Signature Suite, exceptional amenities throughout, and more space-per-passenger than any other riverboats worldwide.

American Encore* began cruising the Columbia and Snake Rivers in May 2026, followed by *American Anthem* in 2027; *American Grace* and *American Beauty in 2028; and American Rhapsody in 2029.
